Specific rules within the framework of IDN

.CA domain names can be registered as IDN (internationalized domain names). Only accented letters of the French alphabet are accepted:

<http://cira.ca/content/register-ca-french>

When You register a .CA domain name, all variants with and without accents are automatically reserved to You by the Registry in the form of a "bundle":

- Domain names reserved as a "bundle" can only be activated by the owner at the Registrar of the registered domain name.
- If You want activate one or several reserved domain names, You will have to make a classic registration request for the domain name(s) concerned.
- If You want make a transfer, all activated domain names in the "bundle" must be transferred to Your new Registrar. One transfer request will have to be made for each domain name within a deadline of 5 days or the transfer requests will be cancelled by the Registry.
- If You want make an owner change, all activated domain names in the "bundle" will also have to be transferred to the new owner.

Other conditions

To register a .CA domain name, You must agree to the following conditions:

- the registration term is from 1 to 10 years,
- to avoid any deactivation of the domain name, the renewal must be paid and funds cleared **before the Expiration date**,
- provide and maintain accurate, reliable and up-to-date personal contact information, failing this the .CA Registry can delete Your domain name,

Upon the Expiration of the domain, We suspend (Hold) the domain name for 45 days, during which time all associated technical services are deactivated. Late renewal at normal price is possible during this period.

Then, the domain name is placed in Quarantine status and can be restored, in accordance with the terms and conditions described on Our website and/or as communicated by Our customer service department. The length of the Quarantine period is 30 calendar days.

If the domain is neither renewed nor restored within these deadlines, the Registry shall place the domain on "Pending Delete" status for several days, and then delete the domain name, which will become available for registration under the "first-come first-served" basis.
